The Lay Grief Counselling Course should include pre-death, death, and post-death treatment. Include in your submission all materials, which you would use. Books may be included by bibliographic entry only (but with all relevant page numbers for reading assignments); power point presentations are to be included and /or overhead transparencies may be done on white paper; audio and video tapes--if used--should be included as bibliographic, titles and sources will be sufficient.

2. **Submit three sermons** which you would preach for the purpose of congregational pastoral care in (1) a grief situation, (2) a geriatric situation, and (3) a situation of charges of sexual abuse or spouse battering within the congregation. Note that these are **general** and not specific (i.e. they are intended for Sunday morning worship service). Include a fourth, mini-sermon, for children which would be oriented towards the prevention and/or exposure of child abuse.

3. **Build a package of educational materials** from your community along with contact numbers that would be useful handouts to your congregation on the topics above. In addition, include bibliographies of reading material on each topic that would be appropriate for your congregation's Sunday school teachers and lay leadership. Please note that it is expected that each student will design this package of materials to support the context of their own ministry, therefore specific materials that will be of value to the student and the congregation's pastoral care or counselling ministries.
